

A NEW SHERIFF COMES TO TOWN: ITS NAME IS SCOO3

Scoo3 is the new Askoll three-wheeled electric kick scooter that revolutionizes the rules of urban mobility

Blocked streets and endless queues, horns and loud sirens, unobtainable parking lots and smog: moving around the city streets in an agile and safe way is becoming increasingly complex. Finding the right compromise when choosing a vehicle seems impossible. From now on, give a twist to your urban experience and give yourself a complete package of **safety, practicality, durability and lots of fun!**

With Scoo3, mopeds' technical and **reliable components meet the convenience and agility of a kick-scooter**. **Askoll**, a leading company in producing Made in Italy electric vehicles, **designed and developed it**. An all-Italian green solution that combines the main benefits of motor vehicles on the market and merges them into a single product, bringing a decisive breath of novelty to city streets.

Easy to drive and ideal even for beginners, **Scoo3 is a resistant and stable vehicle, equipped with three 10" puncture-proof wheels** (one front and two rear), which make it the ideal travel companion for everyday journeys, ensuring **maximum safety** during use and promoting a form of urban mobility that winks at **sustainability**.

Scoo3 is agile and fluid when driving, thanks to the **shock-absorbing systems** and the patented **tilting platform**, allowing optimal handling. **A regenerative braking system**

characterizes Scoo3: the brake lever will enable you to activate both the front energy recovery function and the **rear double disc brake**.

A clean and elegant design also characterizes **Scoo3**: all the cables are hidden in the frame, and the **removable battery is positioned inside the platform**, thus ensuring excellent stability and practicality in recharging.

The result is an **agile, compact and cutting-edge vehicle** which, also thanks to a **range of up to 50 km**, has all the prerequisites for becoming the right compromise for the future of mobility and which lends itself well to the needs of the youngest, who can thus reach the university, the workplace and all the activities foreseen in their free time in record time, with a pragmatic and intuitive approach.

Askoll

I am elettrico

But that's not all! **The reliability and durability** guaranteed by the vehicle are combined with a **smart, fast and fun** driving experience. On board of Scoo3, you can go anywhere and park much easier and don't need a driving licence. Furthermore, with spring just around the corner, moving around the city on a kick scooter will be even more beautiful: the days are getting longer, the weather is mild, and the desire to enjoy the journey from home to work in the open air is growing!

This vehicle that speaks Italian is a mix of technology, safety and ease of use, and thanks to its characteristics, it manages to stand out in the metropolitan background, proposing a form of electric mobility that the city had not yet known and which it did not know it needed.

Scoo3 is an innovative, safe and fun choice that nature likes!

ASKOLL

Askoll EVA S.p.a., born in 2015, is an integral part of the Askoll Group, founded in 1978 by Elio Marioni, based in Dueville near Vicenza. It is an Italian leader in the sustainable mobility market that develops, manufactures and markets e-bikes and e-scooters, as well as kits and components in electric motors and batteries. With a 100% Made in Italy production and a predominantly Italian supply chain, it has conquered a leading international position in just a few years; today, Askoll electric scooters are the best-selling in Italy. 2017 marked the entry of Askoll Eva electric scooters into the business segment, thanks to essential partnerships, including MiMoto, Cooltra, food delivery operators, and last-mile deliveries. Askoll EVA entered the AIM market of the Italian Stock Exchange in 2018 and is present in the main European markets. To date, Askoll EVA can count on an e-commerce and distribution network of about 170 points of sale in Italy and about 80 in the main European markets as well as the UK, Switzerland and Israel.
